

# WE ARE SUSTAINABLE

We look forward to welcoming you to the Hotel Kitzhof.

Your well-being and that of the environment are very important to us. For this reason, we have applied for the Austrian Ecolabel.

We adhere to strict environmental criteria and are monitored accordingly. The certification not only shows our commitment to the environment, but also to the people who are our guests and work here. With these points, we jointly assume ecological and social responsibility:

- prefer environmentally friendly and regional products
- use energy & water sensibly
- reduce CO2 emissions
- use renewable energy
- avoid or separate waste
- train and motivate employees
- promote the regional economy
- preserve natural diversity and cultural heritage
- create offers for guests & the local population
- measure the satisfaction of guests and employees
- continuously improve the (environmental) quality of our business
- support guests in planning a sustainable vacation

We would be delighted if you would support us in our efforts. An active contribution would be:

- close the windows when the heating or air conditioning is on
- switch off the light when you leave the room
- do not leave the water running unnecessarily & press the toilet economy button
- lay towels on the floor for a change
- separate waste into the bins provided
- enjoy precious food with appreciation and help to keep food waste to a minimum
- only smoke where it is permitted
- prefer public transportation & bicycles
- protect flora & fauna during excursions
- respect regional customs
- preferably buy regional, environmentally friendly and low-waste products

Thank you for your contribution.

Ideas and suggestions on how we can improve are very welcome.
